FILE NUMBER: MVP-2007-987-DJP

ADDITIONAL INFORMATION SUPPORTING njd (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite): A wetland delineation report was received at the Waukesha Office for review and concurrence. The wetland delineation report identified two wetland complexes, with a total surface area of approximately 1.1 acres, on the 11-acre project site. The wetlands are described as being confined to a closed depressions. A review of the topographic mapping and aerial photography available on the Kenosha County IMS verified that the wetlands lack a surface water connection and adjacency to a water of US. In addition, a connection between the wetland and interstate commerce was considered but could not be established.
